## PROJECTS

---

### 1. E-LEARNING SYSTEM (Academic Project)

Project was developed to provide a E-learning platform where three different types of login i.e Admin, Teacher, Student. Admin assigned subject to faculty. Teachers uploaded course material and assigned tasks for student performance.Students saw the course material and downloaded the pdf. I have used technology starting with HTML,CSS, JavaScript, Python and MySQL.

### 2. FOOD ORDER

I built a Food Order Project. I have used technology starting with HTML, CSS, JavaScript, Python and MySQL. In this project, I create the Home page to display the menu and food items,then the Cart page and Order page. Then make the Sign In/ Sign Up Popup.

### 3. EMPLOYEE DETAILS

This is designed by using HTML,CSS, JavaScript and JSON. When you click the any Employee name shows all the details about the employee.

## EXTRA-CURRICULAR ACTIVITIES

---

- Core Committee Member of **Youth Red Cross, VIT Chapter**. Responsibilities have included conducting awareness events, and coordinating blood donation camps.
