PROJECTS

Air Cooler.

Duration -2 month

- Air cooling system

This is a device that cools air through the evaporation of water. The temperature of dry air can be dropped significantly through the phase transition of liquid water to water vapor (evaporation). This can cool air using much less energy than refrigeration. In extremely dry climates, evaporative cooling of air has the added benefit of conditioning the air with more moisture for the comfort of building occupants. They are not effective in humid areas.

EXTRA-CURRICULAR ACTIVITIES

- Planting & gardening.
- Cooking.
- Computer games.
