PROFILE

As an Associate Analyst at GlobalLogic Technologies, I specialize in Knowledge Graph (KG) processes, transforming complex data into actionable insights to enhance client search engine results. My expertise includes data analysis, research, management, visualization, and dashboard creation. Responsibilities encompass primary and secondary research, data validation, and updating Knowledge Dashboards (KP). I also prepare quality improvement materials, including spreadsheets, reports, and job summaries, for team and management review. Additionally, I conduct training sessions to ensure project workflow understanding among contributors and potential analysts.
